

The ROI of AI 2025

How agents are unlocking the next
wave of AI-driven business value.

Executive summary

As the AI hype settles, the conversation has shifted to value. Leaders are no longer asking if they should use AI, but how they can scale proven use cases and build sophisticated AI agents for business value. Our latest research confirms this fundamental change in business mindset.

We have seen AI evolve from predictive to generative. Now, we're in the agentic era, where AI agents can independently execute tasks and make decisions—under human guidance and guardrails. At Google, we think of AI agents as systems that combine the intelligence of advanced AI models with access to tools, so they can take actions on your behalf and under your control. And while this technology is already helping people get more done, many companies are still in the early phases of agentic maturity.

Companies that were quick to adopt AI agents are seeing real returns. They're using agents to improve customer experiences, free up employees for smarter work, and give departments like marketing, IT, and HR a productivity boost. This ROI helps justify bigger investments and get leadership on board for a broader AI scaling strategy.

For leaders charting their AI strategy, this report blueprints the strategies of successful early adopters to help you turn agentic AI into tangible business results.

Oliver Parker
VP, Global Generative AI GTM, Google Cloud

88%

of agentic AI early adopters are now seeing a positive ROI on gen AI¹

About this report

This second annual report is based on a survey of 3,466 senior leaders of global enterprises (\$10M+ revenue), conducted by Google Cloud and National Research Group.

It provides a comprehensive benchmark of the impact of gen AI on business and financial performance.

Unless otherwise noted, all statistics in this report are derived from the survey and only include those who are using gen AI in production.

Methodology

16-minute online survey with a total of 3,466 business leaders.

Upper-level, senior executive, and C-suite business leaders, including:

- 940 CEO, CIO
- 1,097 CFO, CMO, CTO
- 768 CISO, CDO, CSO, COO, Director of Digital Strategy, VP of IT
- 661 IT Director, Head of Innovation, Director of Customer Experience/Service, Marketing Director

Over
100
full-time employees

Over

The agentic shift 07

5 proven areas where AI is delivering ROI 21

Investment trends for an AI-ready future 38

Your next steps 46

01

The agentic shift

AI agents have rapidly emerged as the next competitive frontier

Businesses are now implementing a wide range of technologies, from simple chatbots to complex, multi-agent systems that can independently manage complex workflows.

This marks a fundamental shift from AI that simply **assists** to AI that can **operate independently** under human control and guidance. Organizations that are adopting this technology early—backed by executive commitment and increasing funding—are establishing a significant competitive advantage and providing a blueprint for success.

52%

of executives state their organizations using gen AI now also leverage AI agents⁸

Definition of AI agents used in the survey

AI agents are specialized LLMs that have specific roles, context, and objectives to independently plan, reason, and perform tasks with access to data function call APIs and can interact with other AI agents if needed. These can be pre-built or in-house built agents.

⁸ Total (global): n=3466; Question text: (1) How are AI agents leveraged across the enterprise? (2) How many AI agents does your company currently have deployed in production across your organization?

Levels of AI agent maturity

Level 1 Simple tasks

Chatbots

Information retrieval

Image generation

Level 2 AI agent applications

Customer service AI agents

Creative agents

Level 3 Multi-agent workflows

Agentic workflows

Agent orchestration

“

AI agents are applicable across a wide variety of use cases, and I believe every business has workflows where agentic AI can deliver meaningful value. It accelerates existing processes, driving measurable business impact.”

Fiona Tan
CTO, Wayfair

AI agents have arrived

Though its core technologies were largely theoretical just a year or two ago, agentic AI is already in widespread deployment—deeply integrated across industries and around the world.

39%

of executives say their organization has launched more than 10 AI agents⁹

⁹ Total (global): n=3466; Question text: How many AI agents does your company currently have deployed in production across your organization?

“

For humans, time is invaluable. AI can amplify people's work to save that time. We're entering an era where humans and machines will have a truly symbiotic relationship.”

Velit Dunder

VP of Global eCommerce, Radisson Hotel Group

The global footprint of AI agents

The adoption of AI agents is accelerating at a remarkable pace—now rapidly appearing in organizations of every size, sector, and location.

The consistent emergence of AI agents across diverse organizational types points to a powerful, developing trend toward widespread use.

However, the application of AI agents varies by region, as different business imperatives inform the most valuable tasks for agents to take over. Regional priorities shape where these agents show up first—in Europe, for example, AI-enhanced tech support is a key priority. Meanwhile, JAPAC respondents indicated customer service as their organization's top agentic AI use case and LATAM ranked marketing as the key area of potential.¹⁰

¹⁰ Executives whose organizations are leveraging agentic AI: Europe: n=329, JAPAC: n=447, LATAM: n=395; Question text: What use cases has your company deployed AI agents for?

“

Deutsche Bank

AI agents can support humans behind the scenes, and all of that support ultimately translates into improving financial performance.”

Christoph Rabenseifner

Chief Strategy and Innovation Officer TDI and
Head of Corporate VC Group, Deutsche Bank

AI agent adoption rates

NorthAm: n=1247, LATAM: n=701, Europe: n=706, JAPAC: n=702, MEA: n=110

Retail and CPG: n=585, Financial services: n=556, Media and entertainment: n=471, Telecommunications: n=489, Healthcare and life sciences: n=597, Manufacturing and automotive: n=517, Public sector: n=251

Organizations with 100–499 full-time employees: n=1032, Organizations with 500–999 full-time employees: n=740, Organizations with 1000+ full-time employees: n=1694; Question text: (1) How are AI agents leveraged across the enterprise? (2) How many AI agents does your company currently have deployed in production across your organization?

AI agent use cases in action

From customer service and marketing to security operations and tech support, AI agents are helping people get more done—handling the tedious tasks so they can focus on the work that matters to them.

“

Regardless of the industry or your customer base, your competitors will use AI agents. Therefore, you must find a way to use it to your competitive advantage.”

Peter Laflin

Data & Analytics Director, Morrisons

Cross-industry AI agent use cases

Executives whose organization is leveraging agentic AI: n=1814; Question text: What use cases has your company deployed AI agents for?

AI agent adoption varies across industries

While AI agents are being deployed broadly, every industry has its own priorities—as companies put investment into the use cases that deliver the most significant impact.

It's clear that agentic AI isn't a niche trend confined to the technology sector or large corporations. This deployment represents a fundamental operational shift occurring across the business landscape.

“

There are opportunities everywhere for AI agents across the media and entertainment industry. Currently, we're focused on improving media production flow, from idea to distribution.”

Bruno de F. Melo e Souza

Director of Engineering, Data & AI, Globo

Top 3 AI agent use cases by industry

* Separate lists were shown to survey respondents in the healthcare and life sciences and medical devices industries. Data shown on slide is aggregated to both individual industries. Executives whose organizations are leveraging agentic AI: Retail and CPG: n=300, Financial services: n=297, Media and entertainment: n=252, Telecommunications: n=274, Healthcare and life sciences: n=261, Manufacturing and automotive: n=292, Public sector: n=138; Question text: What use cases has your company deployed AI agents for?

The early adopter advantage

Within the broader landscape of AI agent adoption, a distinct cohort of early adopters is setting themselves apart.

These early adopters dedicate at least 50% of their future AI budget to AI agents and already have agents deeply embedded across operations.

The top performance of early adopters isn't chance—it's the result of a deliberate strategy centered on deep technical capability and organizational commitment.

¹¹ Agentic AI early adopters: n=460; Question text: How many AI agents does your company currently have deployed in production across your organization?

¹² Total (global): n=3466; Question text: How many AI agents does your company currently have deployed in production across your organization?

¹³ Agentic AI early adopters: n=460; Question text: Where is your organization in its gen AI journey?

¹⁴ Total (global): n=3466; Question text: Where is your organization in its gen AI journey?

82%

of executives from agentic AI early adopter organizations report their organization has deployed more than 10 AI agents¹¹ vs. 39% across all organizations¹²

78%

of executives from agentic AI early adopter organizations report their organization is leveraging gen AI in production for over a year¹³ vs. 52% across all organizations¹⁴

“

We see all employees at Indosat having a personal agent to amplify our capabilities and improve our overall impact.”

Vishal Gupta

Chief Procurement Officer, Indosat

Your blueprint for AI agent ROI

The success of early adopters provides a clear roadmap for organizations—whether they are building a business case or scaling existing programs.

Leaders in these organizations champion AI in production, sponsor the deployment of multiple agents across the business, and secure dedicated budgets for growth—translating into more consistent ROI.

88% of executives from agentic AI early adopter organizations see ROI now on at least one gen AI use case¹⁵ vs. 74% across all organizations¹⁶

¹⁵ Agentic AI early adopters: n=460; Question text: In what timeframe do you expect gen AI to deliver return on investment (ROI) to the following areas of your business?

¹⁶ Total (global): n=3466; Question text: In what timeframe do you expect gen AI to deliver return on investment (ROI) to the following areas of your business?

¹⁷ Agentic AI early adopters: n=460; Question text: What % of your future AI budget is being allocated to agents? Your best estimate is fine.

¹⁸ Agentic AI early adopters: n=459, Total (global): n=3315; Question text: What percent % of your total annual IT spend is allocated for AI? AI expenses would include Talent, AI Software Licenses, AI Hardware & Infrastructure, AI Application Development. Please exclude data & BI analytics that are not directly using AI or ML. Your best estimate is fine.

¹⁹ Agentic AI early adopters: n=460, Total (global): n=3466; Question text: In which of the following areas have your gen AI solutions created meaningful impact? Please select all that apply.

²⁰ Agentic AI early adopters: n=456, Total (global): n=1802; Question text: Which of the AI agent types that your company has deployed have seen ROI?

Agentic AI early adopter organizations have at least 50% of their future AI budget allocated to agents¹⁷

39% of their organization's total annual IT spend is allocated to AI vs. 26% average¹⁸

Agentic AI early adopters are more likely to report significant value from gen AI across key areas—including customer experience, business growth, security, and marketing¹⁹

Executives from agentic AI early adopter organizations are also more likely to report ROI on all cross-industry agentic AI use cases²⁰

You have to look at ROI as not just size of return but also speed of return. AI initiatives are sizable investments that are not commodities yet, so we have to look at where hyper-automation and scaling with AI is actually generating a return first. How fast is your investment coming back to the organization and what capabilities are you investing in now that will scale up and create more efficiencies or business transformation down the road?”

Cristina Nitulescu

Head of Digital Transformation and IT, Bayer Consumer Health

02

5 proven areas where AI is delivering ROI

We're seeing a virtuous cycle in AI implementation—demonstrable ROI is accelerating the adoption of gen AI for certain use cases, which in turn justifies an even greater focus on those use cases.

After 2024 proved that gen AI really works, 2025 is all about building on that success. Early adopters and leaders are compounding their advantage by layering new AI applications on top of their initial wins.

Our survey assessed the direct value of gen AI across key areas using these 3 measures:

74%

report ROI within the first year (unchanged YoY)²¹

53%

of those reporting increased revenue estimate gains between 6–10% (vs. 52% in 2024)²²

51%

note their average time to market from idea to use case in production is between 3–6 months (vs. 47% in 2024)²³

²¹ Total (global): 2024: n=1539, 2025: n=3466; Question text: In what timeframe do you expect gen AI to deliver return on investment (ROI) to the following areas of your business?

²² Executives reporting increased revenue resulting from gen AI solutions: 2024: n=678, 2025: n=1387; Question text: (1) In what ways did your company experience business growth as a direct result of gen AI? Please select all that apply. (2) Based on your past/existing gen AI initiatives, how much did gen AI directly increase overall annual company revenue? Your best estimate is fine.

²³ Total (global): 2024: n=1533, 2025: n=3459; Question text: What is the average time to market from idea to use case in production? Your best estimate is fine.

Where business leaders see the most value

Five key benefits emerged from the global data set as having the greatest overall gains attributed to gen AI.

While executives' estimates of gen AI value-add are generally more conservative than in 2024, a higher share report improved customer experience.²⁴

These areas provide a template for executives and senior leaders to re-imagine their organization's business functions once augmented with gen AI. Even a well-tested use case, like using gen AI for chat in customer service, can free up valuable human resources for more challenging tasks.

01

Results are based on a composite organization representative of interviewed customers over three years.

“

Security is the perfect use case for gen AI. It can hunt down threats and even remediate them around the clock.”

Zafar Chaudry

Chief Digital Officer & Chief AI and Information Officer, Seattle Children's Hospital

03

Investment trends for an AI-ready future

The maturation of AI is also reflected in a shift in its funding.

Businesses are revising their priorities to align with the AI-first future—investment is growing, and a higher portion of AI budgets is being aimed at AI agent deployment.

“

AI technology is evolving quickly. A year ago, very few people were talking about AI agents and agentic AI at the enterprise level. With agentic AI as a positive disruptive force for our industry, we have to rethink processes for people and AI consumption—prioritizing agentic AI is about setting ourselves up for the future.”

Cristina Nitulescu
Head of Digital Transformation and IT, Bayer Consumer Health

Top 5 business objectives within the next 2-3 years

Total (global): 2024: n=1539, 2025: n=3466; Question text: In light of recently completed gen AI initiatives, which of the following business objectives are you planning to pursue with gen AI within the next 2-3 years? Please select all that apply.

Overall AI spending is rising

AI is now a mission-critical enterprise investment—evidenced by two clear trends.

As technology costs fall, overall spending is rising. These new investments are increasingly funded by reallocating capital from non-AI budgets,³⁸ in addition to 26% mean percent of total annual IT spend already allocated for AI.³⁹

77%

report their organization's gen AI spend has increased as technology costs fall (not fielded in 2024)⁴⁰

58%

report their organization is allocating net new budget (without reducing other budgets) to fund gen AI investments (vs. 61% in 2024)⁴¹

48%

are reallocating non-AI budget to fund gen AI investments (vs. 44% in 2024)⁴²

³⁸ Total (global): 2024: n=1539, 2025: n=3466; Question text: What is your approach to funding gen AI? Please select all that apply.

³⁹ Total (global): 3315; Question text: What percent % of your total annual IT spend is allocated for AI? AI expenses would include Talent, AI Software Licenses, AI Hardware & Infrastructure, AI Application Development. Please exclude data & BI analytics that are not directly using AI or ML. Your best estimate is fine.

⁴⁰ Total (global): n=3466; Question text: Did the decreasing costs of AI technology (model training and operating) change your spending on gen AI?

⁴¹ Total (global): 2024: n=1539, 2025: n=3466; Question text: What is your approach to funding gen AI? Please select all that apply.

⁴² Total (global): 2024: n=1539, 2025: n=3466; Question text: What is your approach to funding gen AI? Please select all that apply.

Top investment areas to accelerate AI adoption

Total (global): 2025; n=3466; Question text: Which of the following are the top 3 areas of investment to accelerate gen AI adoption within your organization? Please select the top 3 areas of investment for your organization.

“

COMMERZBANK 

At Commerzbank we prioritize AI use cases that promise the greatest ROI, enabling us to unlock significant cost savings.”

Oliver Dörler

Chief Data and AI Officer, Commerzbank

ROI continues to need C-suite sponsorship

The biggest returns come when AI is aligned to clear business goals.

The formalization of AI strategy is most evident in the stability and strength of executive sponsorship.

Similar to last year's findings, C-suite sponsorship remains crucial for successful AI adoption. Executives who report their organization has comprehensive executive alignment are consistently more likely to see a tangible ROI from their AI initiatives.⁴³

⁴³ Executives who report their organization has comprehensive C-level sponsorship and clear corporate vision for gen AI objectives: 2024: n=540, 2025: n=1269; Question text: In what timeframe do you expect gen AI to deliver return on investment (ROI) to the following areas of your business?

“

Leaders need to first decide what ROI means. It goes beyond financial returns. We have to ask if it's making people more efficient and building towards business objectives—really clearly define what we're trying to achieve.”

Eric Lambert

Vice President, Legal and Employment Counsel, Trimble

78%

of executives who report their organization has C-level sponsorship report seeing ROI now on at least one gen AI use case in 2025⁴⁴

“

DASA

C-level sponsorship is essential when rolling out any new technology. Leadership needs to understand what it is, how it works, and the impact it can have in order to secure the right resources and budget for success.”

Anaterria Oliveira
Vice President of Technology, Dasa

Even more telling is the significant increase in strong alignment between gen AI adoption and C-suite level sponsorship—which grew from 69% in 2024 to 73% in 2025.*⁴⁵

* Strong alignment indicates selecting either a 4 or 5 to the question “How is gen AI adoption connected to your organization’s business goals?”, with a 5 indicating “Comprehensive C-level sponsorship and clear corporate vision for gen AI objectives.”

Key challenges to consider

For many organizations, the top challenges with AI are rooted in the foundational work required to support them.

Overcoming the complexities of systems integration and meeting the high standards for data security represent the most significant hurdles. The solution lies in adopting a modern, integrated data strategy that prioritizes strong governance and security protocols from the start. This approach ensures that data is both accessible for innovation and secure throughout the entire AI lifecycle.

Over 1 in 3

indicate that data privacy and security is a top consideration for LLM providers⁴⁶

“

Deutsche Bank

While everyone believes in their value, deploying AI agents while covering enterprise security, compliance and other requirements is still tremendously difficult.”

Christoph Rabenseifner

Chief Strategy and Innovation Officer TDI and
Head of Corporate VC Group, Deutsche Bank

⁴⁶ Total (global): n=3466; Question text: Which of the following factors are MOST important to your company when considering LLM providers? Please select the top three.

“

The biggest security concern with LLMs is the risk of bad actors getting access to your data, or the LLM hallucinating or changing it. The risk is you lose the true view of your data, then it becomes a vicious cycle.”

Natalie Bowman

Managing Director, Product & Experience Design, Alaska Airlines

04

Your next steps

The AI agent ROI checklist

- ✓ **Find your executive champions.** Cultivate C-suite sponsorship to advocate for AI initiatives, clear roadblocks, and align to results.
 - ✓ **Demonstrate value to secure AI budget.** Build a compelling business case for why AI deserves its own investment.
 - ✓ **Create your AI rulebook now, not later.** As AI use grows, so do the risks. Establish clear, enterprise-wide guidelines to secure your data, protect IP, and ensure compliance as you scale.
 - ✓ **Start with the biggest wins.** Not all AI projects are created equal. Focus your energy on building AI agents that can automate repeatable tasks to deliver clear ROI.
- ✓ **Build trust in AI from day one.** First, get your data house in order with a robust data governance and enterprise security framework. Second, always keep a human-in-the-loop.
 - ✓ **Give your AI agents the tools to be useful.** For an AI agent to do the work, it needs access to your internal enterprise systems, like your CRM or Drive. Grant it secure, governed access.
 - ✓ **Invest in your talent and internal AI education programs.** The most successful companies don't just buy technology, they build skills.
